

The screenshot shows the nexsure CRM software interface. At the top, there's a navigation bar with links for HOME, HELP, SETUP, and LOGOUT, along with a Bookmarks section. Below the navigation is a search bar and a breadcrumb trail: SEARCH | ORGANIZATION | REPORTS | CAMPAIGNS | ELINKS. The main area displays a search results grid titled "HISTORY RESULTS - CLIENT". The search criteria on the left include: Entity (Client), Search Type (Contains), Branch (All Branches), Client Stage (All), Client Type (All), Click Class (All), Code Designation (All), Status (All), Client (empty), Policy Number (empty), Policy Description (empty), Phone Number (empty), Location Name (empty), and Location Address (empty). The search results show 9 Record(s) Found. The grid columns are: Details, Name, Client Type, Stage, Location Name, City, St./Prov., Zip/Postal, and Remove. The data includes:

Details	Name	Client Type	Stage	Location Name	City	St./Prov.	Zip/Postal	Remove
Cathy Smith	Commercial	Client	234 George Way	Calera	AL	35040		
Ateam Auto	Commercial	Prospect	Ateam Auto	Fullerton	CA	92831		
William Idol & Associates	Commercial	Client	Corporate office	Brea	CA	92821		
Henderson Hardware & Supply Company & Electronics	Commercial	Client	Winston location	Brea	CA	92821		
Busy Bee Crafts	Commercial	Client	Retail	Brea	CA	92821		
Bob Smith	Commercial	Client	primary residence	Brookfield	WI	53045		
1-2 Testing	Commercial	Client		Atlanta	GA	30305		
Audit Customer	Personal	Client						
Chris P Critter	Personal	Prospect	Home	Fullerton	CA	92831		

At the bottom of the grid, there are buttons for Search and Clear, and a link to "2991cp".

Connecting to Nexsure

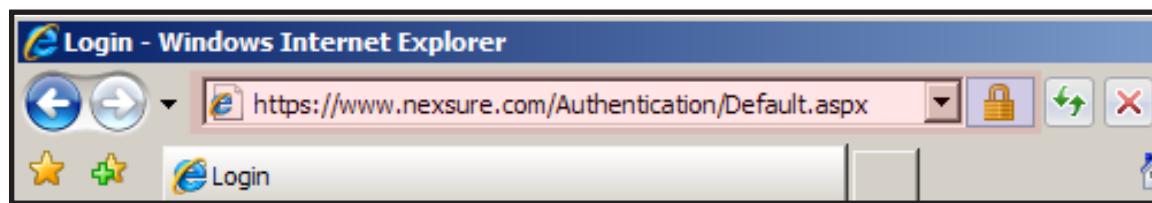

HOW to Access the Internet and Login to Nexsure

1. Double click the **Internet Explorer** icon on your desktop.

2. Internet Explorer will display the default home page. At the top of the screen on the Internet Explorer Address Bar, click and type: **www.nexsure.com** then click **Go** on the right side of the Address Bar or press **Enter** on the keyboard. The browser will redirect to the secure login page, <https://www.nexsure.com/Authentication/Default.aspx>. It is a good habit to bookmark your secure Nexsure URL.

Note: Clicking on the Internet Explorer Address Bar automatically highlights the current text, allowing replacement with entered text.

3. The Nexsure welcome screen is displayed.

Welcome to Nexsure. Please login.

Login Name:

Password:

Login

[Change password](#)

[Forgot your password?](#)

[New user registration request](#)

In order to login to Nexsure, you must first be assigned a Login ID and password. Each user is required to have a unique login name, which must not be shared.

WHY the Login Needs to Be Unique

The unique login is required because this login name identifies the correct site assigned to your organization. Nexsure does not allow a login to be used if it has been previously assigned. We will recommend the preferred login methodology at the time of training to take out any guesswork. (See **Employee Security** for instructions on adding login ID's and passwords)

To access Nexsure:

- Enter the **Login Name** assigned to you by your administrator.
- Enter the **Password** supplied by your administrator.
- Click the **Login** button or press **Enter** on your keyboard.

Login Name:

Password:

Login

Users may have multiple levels of security depending on security requirements within the organization. When users with multiple levels of security login to NEXSURE, the active account links are displayed to allow the user to select the security level (See **Employee Security** for instructions on adding multiple levels of security). After selecting the level of security from the drop-down box, the selected security level is displayed. Clicking on the active account link logs the user in with the appropriate level of security assigned based on the selection.

The screenshot shows the NEXSURE login interface. At the top, there's a red header bar with the NEXSURE logo and the text "XDimensional Technologies". Below the header, a black navigation bar contains links for LOGIN, SUPPORT, SECURITY, ABOUT NEXSURE, ABOUT XDTI, and XDTI HOME. The main content area has a light gray background. A message in bold black text reads: "You have been assigned to multiple accounts, which one would you like to use?". Below this message, there's a table titled "Please select an account to continue:". The table has columns for Account, Entity Name, Entity Type, Status, and Date Created. It lists three entries:

Account	Entity Name	Entity Type	Status	Date Created
Administrator	XDTI--Training Org 972003	Organization	Active	Oct 9 2003 6:17PM
Organization	Atlantic Territory	Territory	Active	Aug 11 2008 1:25PM
Admin Setup				

Note: Most users will have a single security sign on. Multiple security access is available for those requiring different security levels. For example, someone may need access to work at Branch level with a high security level and at Territory level to enter cash receipts for all branches in the organization.

Notes

Changing Passwords

WHY Change Passwords

Users can be required to enter a new password after a specified number of days. This feature is activated in **SETUP > Security Administration** by entering the amount of days in the **Number of days before users are required to change password** field. After the specified number of days have passed since the password was last changed on login, the user is prompted to enter a new password. (See **Security Setup** for more details on this feature)

If a user needs to change their password, this may be done by clicking on the **Change Password** link on the Nexsure Welcome screen. Clicking on the **Change Password** link displays the fields required to change the current password. New passwords must meet the criteria established by the System Administrator in Security Administration setup. For instructions on how to setup security criteria, see "Security Policy", Chapter 9, *Admin Training Manual*.

- Begin by entering the current login name into the **Login Name:** field.
- Enter the current password into the **Old Password:** field.
- Enter the new password into the **New Password:** and **Confirm New Password:** fields.
- Click on the **Change Password** button to complete the process.

Please enter your login name, old password and new password.

The form consists of four text input fields arranged vertically. Each field has a label to its left: 'Login Name:', 'Old Password:', 'New Password:', and 'Confirm New Password:'. To the right of each label is a corresponding empty text input box. At the bottom of the form is a blue rectangular button with the text 'Change Password' in white.

A **Password Change Completed** message displays confirming the successful completion of the password change. Click the link to proceed to Nexsure.

If there is an entry error, a message will appear stating why the password was not changed. Make the necessary corrections and try again.

Note: While using Nexsure, you are responsible for maintaining the confidentiality of your account and password as well as restricting access to your computer. You also agree to accept responsibility for all activities that occur under your account or password.

Forgot Your Password?

If you forgot your password, a new one may be generated by clicking on the **Forgot your password?** link on the Nexsure Welcome login screen. The screen refreshes to prompt for the **Login Name** associated with the forgotten password. Enter the **Login Name** and click the **Reset Password** button.

A system generated temporary password is emailed to the email address on file for the Login Name. A Password Reset Successfully message displays.

Note: In order to receive the system generated password, the employee must have an e-mail address on their **employee detail** screen. For instructions on how to set up employees in Nexsure, see "HOW to Add Employees for the Organization", in Chapter 1, *Admin Training Manual*.

The employee will be required to change the system generated temporary password upon login to Nexsure. To change the temporary password, do the following:

- Open the System Notification email containing the new Nexsure password. Copy the password. The password will be lengthy so copying will make this process quicker.
- Log in to Nexsure with your **Login Name** and paste the system generated password in the **Password** box. Click the **Login** button.
- The Change Password screen displays with the Login Name pre-filled.
- Paste the system generated password in the **Old Password** box. Enter and confirm the new password.
- Click the **Change Password** button.
- At the **Password Change Completed** message, click the **click here** link to proceed to Nexsure.

Note: New passwords must meet the criteria established by the System Administrator in Security Administration setup. For instructions on how to setup security criteria, see "Security Policy", Chapter 9, *Admin Training Manual*.

Requesting Additional User Licenses

Organizations that have exhausted the total number of licensed users may need to send a request for additional user licenses. Clicking the **New User Registration Request** will open a form to e-mail to the XDimensional Technologies, Inc. Sales department to request the addition. The primary contact of the organization is the only one that should use this link, since only they can add user licenses. The primary contact should complete the request details and click the **Submit** button to send the e-mail. The Support department will contact the primary contact of the organization to verify the request and relay the details to our accounting department to complete the process.

The screenshot shows a web page titled "Nexsure Registration Request". At the top, there is a red header bar with the "nexsure" logo. Below the header, a black navigation bar contains links for LOGIN, SUPPORT, SECURITY, ABOUT NEXSURE, ABOUT XDTI, and XDTI HOME. The main content area has a light gray background with a faint watermark of the "X Dimensional Technologies" logo. The form itself is titled "Nexsure Registration Request" and includes a note in parentheses: "(* indicates required fields)". It contains the following fields:

- Contact Name: *
- Company:
- Phone: *
- Fax:
- Email: *
- Address:
- City State, Zip:
- Contact By:
-

Notes

Logging Out of Nexsure

WHY Use the Logout Link

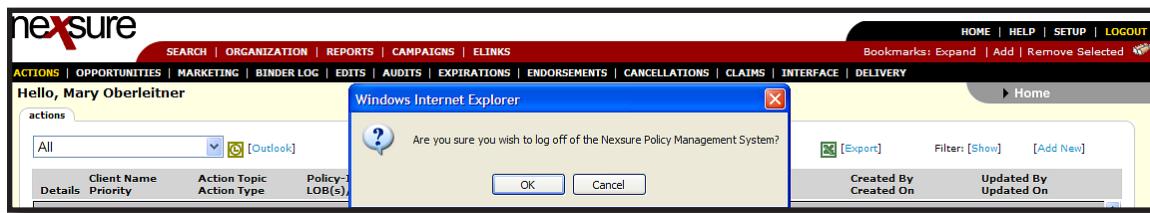

Users should log out of their Nexsure sessions when leaving the computer for any length of time to keep the site secure. If you plan to return in a few minutes and do not want to log out of Nexsure, use **Control-Alt-Delete** on the computer keyboard and select the **Lock Computer** button to block access.

The preferred method of logging out of all Nexsure sessions is to use the **LOGOUT** link located on the **Utility** menu in the upper right corner. This method is preferred because it frees up the registered license and lets others in the organization know that you are not available. If you do not log out of Nexsure before navigating to a different Web site, the login still appears as active in the Employee List under the **ORGANIZATION** link and the license is still in use until one of the following occurs:

- You sign in again on another computer.
- The organization's administrator logs you out.
- The session times out in 4 hours.

This does not mean that multiple Internet Explorer pages cannot be open in addition to the Nexsure page. It simply means that while logged into Nexsure, typing another site address will navigate away from the Nexsure page. So if another site needs to be opened along with Nexsure, click on the **Internet Explorer** icon and open another session.

Note: You should logout before clicking the  to close your Internet Explorer window. Closing Internet Explorer does not automatically log you out of Nexsure.

HOW to Login to NEXSURE More Than Once

NEXSURE allows you to login multiple times on a single computer with your one Login Name and Password. Multiple logins allow you to work in one client and have another client open at the same time.

Note: Use caution when using multiple logins to display the **same** client or area of NEXSURE in more than one NEXSURE browser session. One session should be used to update information and the other to view information only.

To launch another session of NEXSURE on the same computer:

1. Click the Internet Explorer Icon on your desktop or Quick Launch bar.

Note: Do not use Tabbed Browsing in Internet Explorer 7. You must launch a new Browser session by clicking the Internet Explorer icon.

2. Internet Explorer will display your default home page. In the Address Bar, navigate to www.nexsure.com just as you did for your initial login.
3. Login with your same Login Name and Password.
4. When you have finished working in the alternate session, click LOGOUT on the Utility menu and OK to logout.
5. Navigate to your prior session to continue working on the previous client.

Your NEXSURE license will be released when you have logged out of all NEXSURE sessions on your computer. If you login to NEXSURE on another computer, your previous sessions will be terminated.

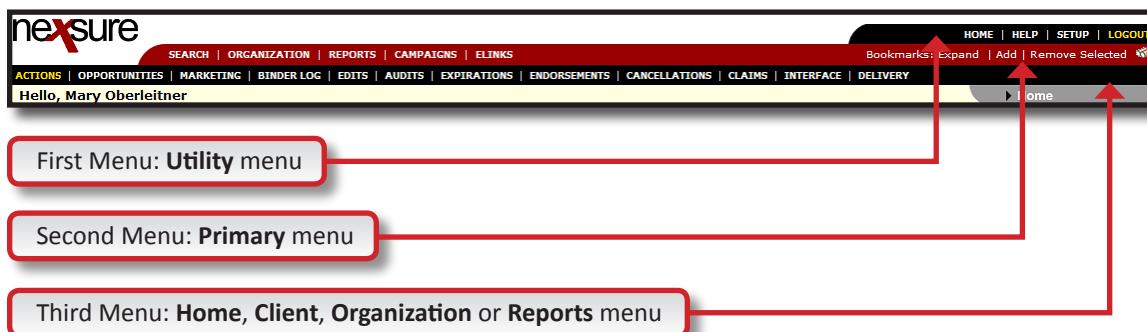

All user based settings, such as Entity Search History, Save Filter Settings and Bookmarks, will change in all sessions of NEXSURE.

Terminology

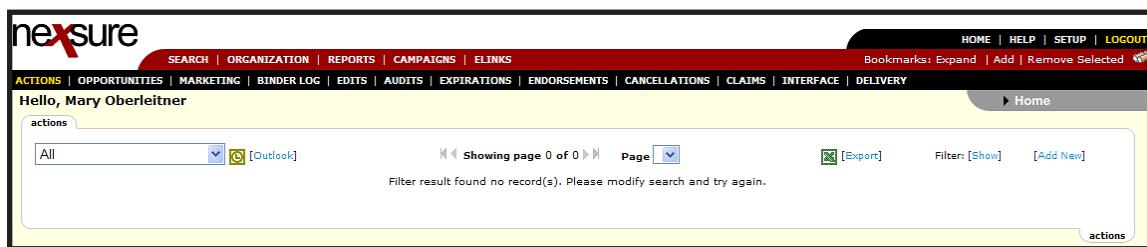

WHY Use the Proper Terminology

Nexsure is a Web-based application and it is important to learn the proper terminology when communicating within your group and with the Support team at XDimensional Technologies, Inc.

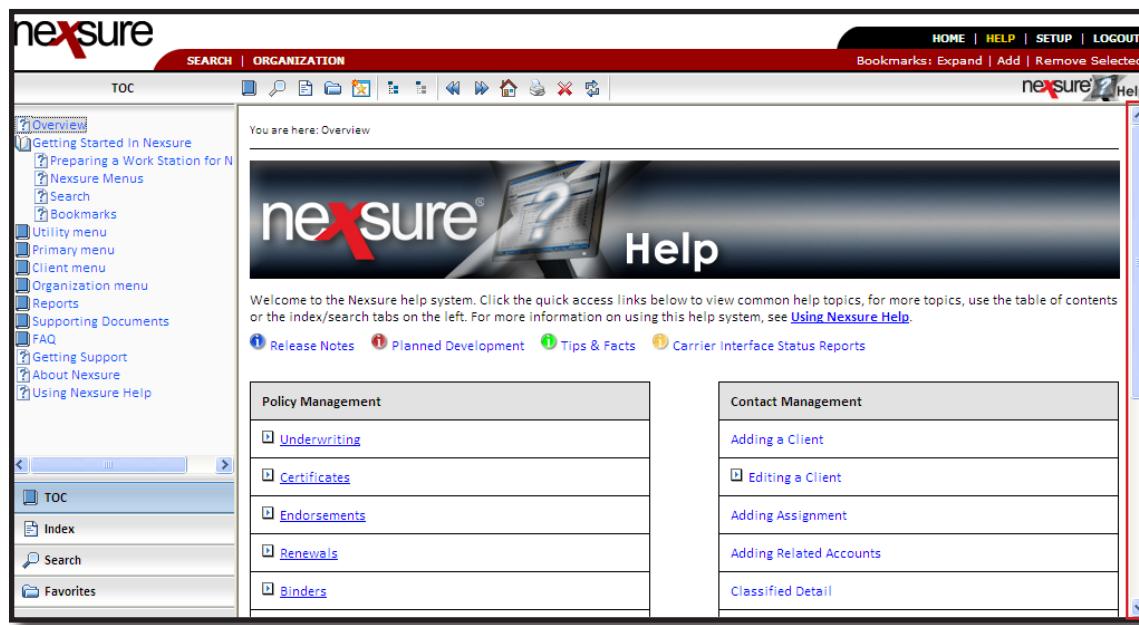

1. A **menu** contains active links to access specific areas of Nexsure and there are 3 basic menus.
 - The first menu located on the right side of Nexsure after logging in is the **Utility** menu.
 - The second located just under the **Utility** menu is identified as the **Primary** menu. The first two menus in Nexsure will always be present.
 - The third menu in Nexsure is dynamic, which means this menu is interactive and the links on the menu will change depending on what area of Nexsure you are in. The name of this menu varies and is identified as:
 - **Home** menu after clicking the **HOME** link on the primary menu.
 - **Client** menu after clicking on the client **Details**  icon.
 - **Organization** menu after clicking on the **ORGANIZATION** link.
 - **Reports** menu after clicking on the **REPORTS** link.

2. A **link** launches some type of an action when clicked. Links can display a different page or section of the application, launch e-mail, open an external Web site (such as MapQuest®), or even save data. In many cases clicking a **link** is like clicking a button in a software program running locally on your computer.

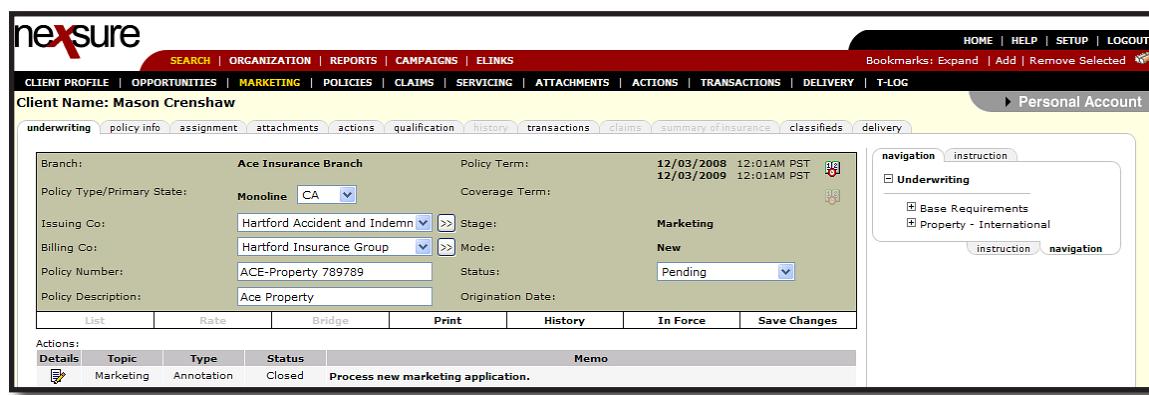

3. **Scroll bars** allow the display window to be moved to display information out of view. Click and drag the **scroll bars** horizontally or vertically when available. These bars are only available when there is other information present to view.

Note: The proper screen resolution for Nexsure is 1024 x 768 pixels.

4. A **header** is the name of the shaded area displayed for all policy stages, invoices and accounting functions. The **header** contains the basic information pertaining to the current screen.

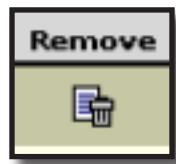

5. A **drop-down box** appears with an arrow button. Clicking the button displays a list of options allowing one selection.

Note: The contents of many drop-down boxes in Nexsure can be customized by the organization such as referred by located on the **CLIENT PROFILE > profiling** tab.

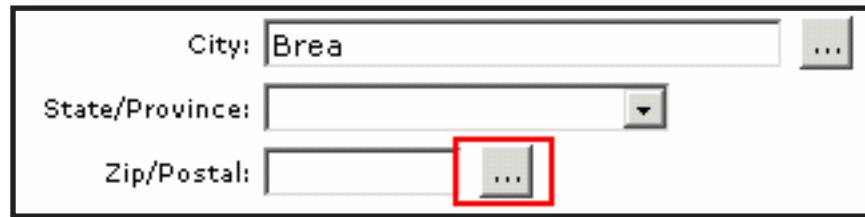

6. An **icon** is an image representing a specific item. Clicking on an active **icon** will launch a new screen that is associated with the icon.

7. **Option buttons**, sometimes referred to as radio buttons, are small circle options that may be clicked for a single selection. When an option is clicked, a dot appears inside the selected item. Usually only one option at a time may be selected.

8. An **ellipsis** appears as a button with three dots on it. Clicking on these buttons will allow browsing applicable selections, such as a zip code or a city.

Notes

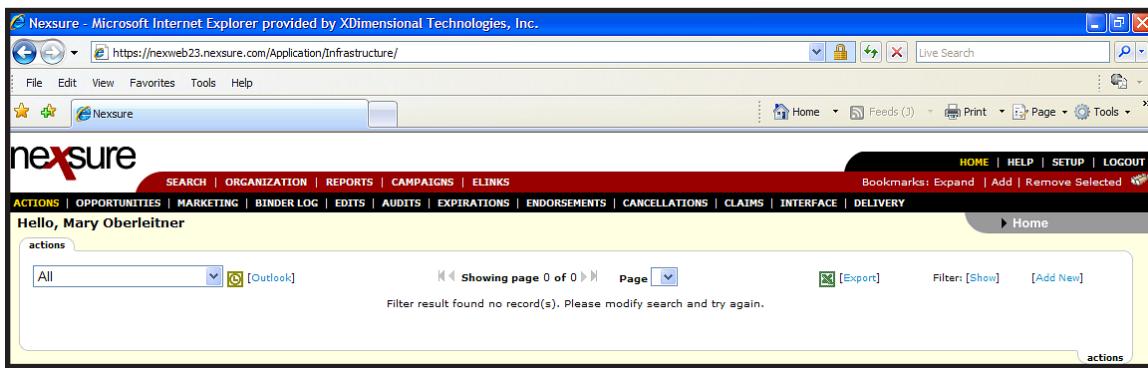

Navigating in Nexsure

Nexsure is a Web-based Management System and has the same characteristics as any Web site. With that being said, keep in mind that refreshing the screens is required after any change is made. Typically this is automated within the normal processes of Nexsure.

Web browsers store content from previously viewed sites in their Temporary Internet Files folder. This allows the browser to load a previously viewed page from a site without reloading it. When using Nexsure, it is important to clear these files periodically to make sure the new screen information is shown rather than the old. To delete the Temporary Internet Files, perform the following steps:

- In Internet Explorer, go to the **Tools** menu and select **Internet Options**.
- Under the **General** tab, click on the **Delete Files** button in Internet Explorer 6, or **Browsing history's Delete...** button in Internet Explorer 7.

The **Back** button in Internet Explorer is frequently used to navigate, but with Nexsure it is important not to use this navigation tool. A “Warning: Page has expired” message may be encountered when using the **Back** button. This backward navigation is blocked to avoid duplicating a record that you may have just added. Since Nexsure will always have a way within the program to navigate, using the Internet Explorer **Back** button is not necessary.

Note: Nexsure security is similar to that used when placing an order at a secured shopping site. Every Nexsure session is secure, using the SSL protocol and 128-bit strong encryption.

HOW to Navigate in Nexsure

There are various ways to navigate in Nexsure and it is important to learn the basic navigation techniques.

1. Links are found throughout Nexsure and are used for various functions. When clicking a link, such as the **SEARCH** link on the **Primary** menu, it will display the item appropriate to that selection. In this case, clicking **SEARCH** displays the Search window.

The screenshot shows the Nexsure search interface. At the top, there is a search bar with dropdown menus for 'Entity' (set to 'Client'), 'Search Type' (set to 'Contains'), and other filters like 'Client Stage' (All), 'Client Type' (All), etc. Below the search bar is a message: 'You must search for a record prior to entering a new one. After the results are returned you will be given the option to add a new record.' To the right of the search bar is a red 'SEARCH' button. The main area is titled 'HISTORY RESULTS - CLIENT' and shows a grid of 27 records. The columns include Details, Name, Type, Stage, Phone #, Location Name, City, St./Prov., Zip/Postal, and Remove. The first few records listed are:

Details	Name	Type	Stage	Phone #	Location Name	City	St./Prov.	Zip/Postal	Remove
	Nunnally's Glass & Framing Inc.	C	C	(256) 835-6677	929 S Noble Street	Anniston	AL	36201	
	Cable One	C	C	(256) 236-7034	620 Noble Street	Anniston	AL	36201	
	Max's Restaurant Group, Inc.	C	C	10-888-777-5656	Elaine's Test Client	Hartford	CT	06103	
	AAA Test	C	C			Brea	CA	92821	
	James Crenshaw	P	C		Residence	Anniston	AL	36201	
	Anthony Smithnet	P	C		Home office	Seguin	TX	78155-3143	
	Miller Florist and Gifts	C	C	(256) 835-0911	38 East Hamric Drive	Oxford	AL	36203	
	Oxford Airport	C	C	(256) 835-2211	789 Hwy 78	Oxford	AL	36203	
	Boise State University	C	C		Main	Boise	ID	83701	
	Bryant Racing	C	C	(213) 753-5050	Aspen Colorado Financial Office	Aspen	NJ	81611-1234	

Other links available in Nexsure are:

- **[Add New]:** Always allows a new record to be added.
- **[Show]:** Clicking this link is always used with the **Search Filter** feature which allows searching for a specific policy or item such as invoice. The **[Show]** link can be found on almost all summary views.
- **[Save]:** Clicking any type of **[Save]** link allows the information in the specific area of Nexsure to be saved.
- **[Update]:** Clicking this link will update any changes made to the specific record in Nexsure.
- **[Cancel]:** Aborts current activity.
- **Names:** Clicking on the actual name displays the contact record for the individual. If a carrier name is clicked and an additional login has been setup, the carrier site is automatically accessed using the login. Example of an active link: Name: [John Doe](#)
- **Addresses:** When the address itself is clicked, a MapQuest® map for the selected address is displayed.

Example of an active link: Address: [8790 Habersham](#)

- **E-mail Address:** Link will display an e-mail delivery screen that can be used to send an e-mail to the individual.

Example of an active link: E-mail: jdoe@xdti.com

Note: Sending an e-mail using the e-mail link allows it to be stored on the Delivery page for this client. Use the HOME > DELIVERY page to track delivery success.

- **Cell Phone:** Clicking on the words [cell phone](#) in a contact's record will allow a text message to be sent to the individual's cell phone.

Note: The cell phone must be set up to receive text messages. There is no record kept in Neksure of the text message sent. To keep a record of the text message you can CC yourself and attach the text message to Neksure from Outlook.

- **Phone Numbers:** Links launch Internet Explorer and display the Fone Finder query results for that phone number.

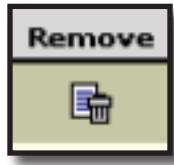

Area Code	Prefix	City/Switch Name	State/Prov. Area Map	Telephone Company Web link	Telco Type	Map Link
714	672	BREA	California	PACIFIC BELL	RBOC	

2. Tabs always appear below menus and are associated with that menu. Tabs display a summary view of data. A Details icon is generally provided to look at the details of each item in the view.

Note: Tabs can be found at both the top and bottom of the summary view screens. This feature makes scrolling back to the top unnecessary.

3. **Remove** icons are displayed on tabs in a summary view, one **Remove** icon per record. Clicking the **Remove** icon will allow the deletion of a record if security has been granted.

Note: The Remove icon availability is based on the security template the user has been assigned to.

4. **Page navigation links** activate when the results of a search are larger than one page. The **paging link** is used to navigate through multiple pages or the **paging drop-down box** can be used to go directly to the selected page.

- Single Page Forward ►
- Single Page Back ◀
- Last Page ► |
- First Page | ◀

The screenshot shows the nexsure CRM search interface. At the top, there is a navigation bar with links for HOME, HELP, SETUP, SUPPORT, and LOGOUT. Below the navigation bar, a search bar is present with the placeholder "All Branches". A message below the search bar states: "You must search for a record prior to entering a new one. After the results are returned you will be given the option to add a new record." On the left side, there is a sidebar with various search filters: Entity (Client), Search Type (Contains), Client Stage (All), Client Type (All), Code Class (All), Code Designation (All), Status (All), Client (text input), Policy Number (text input), Policy Description (text input), Phone Number (text input), Location Name (text input), Location Address (text input), Location City (text input), Location State/Prov (All), Location Zip/Postal (text input), First Name (text input), Last Name (text input), and Enterprise Code (text input). To the right of the filters, a table titled "HISTORY RESULTS - CLIENT" displays 27 records found. The columns in the table are: Details, Name, Type, Stage, Phone #, Location Name, City, St./Prov., Zip/Postal, and Remove. The table lists various clients with their details such as name, phone number, location, and city.

- The Navigation Toolbar is found under Policy headers, Invoice headers and all Accounting headers. The **Navigation Toolbar** links will pertain to the record accessed.

The screenshot shows the nexsure CRM marketing policy header for a policy underwriting. The top navigation bar includes links for HOME, HELP, SETUP, and LOGOUT. Below the navigation bar, a message says "Client Name: Mason Crenshaw". The main form area contains fields for Branch (Ace Insurance Branch), Policy Type/Primary State (Monoline CA), Coverage Term (12/03/2008 12:01AM PST to 12/03/2009 12:01AM PST), Issuing Co (Hartford Accident and Indemnity), Stage (Marketing), Billing Co (Hartford Insurance Group), Mode (New), Policy Number (ACE-Property 789789), Status (Pending), and Policy Description (Ace Property). To the right of the main form, there is a navigation toolbar with sections for Underwriting, Base Requirements, and Property - International. The Underwriting section is currently active.

Note: Some links on the navigation toolbar will be grayed out, the links will become active as needed.

- Quick Navigation** links are displayed in a tree view on the right hand side of a Policy in the navigation tab, on Invoices and all Accounting functions. Clicking a **Quick Navigation** link will take you directly to that section of the form or invoice.
